- Integration
- Implementation

About Me

I have worked with web development since 2019, providing softwares to private security companies. The solutions I build with my team have a daily impact on over 100.000 users around the world.

I am searching for new opportunities where I can apply my knowledge and experience built over the years and overcome new challenges.

Experience

Junior Developer

Solutio Software
2019 - Currently

Solutio Software is a software house focused on the private security market, and its main goal is to facilitate internal processes through automation and operational costs reduction.

- I have coded the website and many web softwares.
- Technologies: PHP, Javascript (jQuery), Mysql, Docker, HTML, CSS, Bootstrap, Github, VueJs, Linux Desktop e Server.
- I led a 3 person team.
- I developed integrations between softwares using API's and scripts for integration between databases.
- Participated in implementations remotely and presentially at customers.

IT Assistant

Cindapa
2017 - 2019

Cindapa is a private security company that provides security and surveillance services for customers in Brazil.

- Network, servers and computer support and maintenance.
- CCTV Installation and configuration.
